

NFDC REPORT MAY 2016

Cllr Peter Armstrong

During the last month I have been part of a District Councillors' group who have been involved in discussion and agreement to make a strong response to HCC regarding the importance of all three Household Waste Recycling Centres in the New Forest.

The planning application for sand and gravel extraction with HCC has involved a fair bit of resident correspondence and advice especially around using planning conditions to object.

Some Housing Associations continue to be a problem in getting answers for local residents.

Litter – I have met with the Team at the District who are keen to make next year even bigger and better and continue to involve the National Park and the Forestry Commission. I am also in discussion with Keep Britain Tidy and some locals as to what to do next.
