Dear Sir or Madam

**Upgrade Works to existing Base Station at CTIL 126909 - Vodafone Installation  
23288: Site Address - Rooftop, South Street Centre, 16/20 South Street, Hythe,  
Hampshire, SO45 6EB. NGR 442460,107730**

Vodafone Limited has entered into an agreement with Telefónica UK Limited pursuant to which the two companies plan to jointly operate and manage a single network grid across the UK. These arrangements will be overseen by Cornerstone Telecommunications Infrastructure Ltd (CTIL) which is a joint venture company owned by Telefónica UK Limited and Vodafone Limited.

This agreement allows both organisations to:

- Pool their basic network infrastructure, while running two, independent, nationwide networks
- Maximise opportunities to consolidate the number of base stations
- significantly reduce the environmental impact of network development

Vodafone has identified this site as suitable for an equipment upgrade. The purpose of this letter is to consult with you and seek your views on our proposal before proceeding with the works. We understand that you are not always able to provide site specific comments, however, *Vodafone* is committed to consultation with communities for mobile telecommunications proposals and as such would encourage you to respond.

As part of Vodafone's continued network improvement program, there is a specific requirement for an upgrade at this location to provide 4G coverage to the area

Mobiles can only work with a network of base stations in place where people want to use their mobile phones or other wireless devices. Without base stations, the mobile phones and other devices we rely on simply won't work.

Please find below the details of the proposed site and the Technical need:

- Upgrade Works to existing Base Station at CTIL 126909 – Vodafone Installation 23288: Site Address – Rooftop, South Street Centre, 16/20 South Street, Hythe, Hampshire, SO45 6EB. NGR 442460,107730
- *New 4G coverage*
- The requirement is for the removal of 6 no. existing antennae and 6 no. RRU units to be replaced with 6 no. sector antennae at a height of around 14.0 metres metres to the underside and located on the existing steel pole mounts on the plant room of the roof at South Street Centre, with 6 no. ancillary RRU's in the same location as the existing RRU units together with associated replacement cabling. Four no 300mm in diameter link transmission dishes are also to be attached to the existing pole mounts at heights of between 14-15m to the centre line and at orientations to be determined. At ground level and within the existing compound, additional electronic apparatus will be installed in the existing Vodafone equipment cabin.

The Local Planning Authority must register and our records of other potential sites have already been reviewed, the policies in the Development Plan have been taken into account and the planning history of the site has been examined.

All *Vodafone* installations are designed to be fully compliant with the public exposure guidelines established by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). These guidelines have the support of UK Government, the European Union and they also have the formal backing of the World Health Organisation.

We look forward to receiving any comments you may have on the proposal within 14 days of the date of this letter.

**Yours faithfully,**

*J.A. BIRD*
